Dear Tamara Freeburn

**RE: Outcome of Research Request- 28144 – Mission Australia Youth Survey 2026.**

I am pleased to advise that your application for the research project “*Mission Australia Youth Survey 2026*” has been supported by the Northern Territory Department of Education and Training.

Please note approval is subject to a centralised recruitment approach. The research team must not directly contact or approach NT Government schools to seek participation. All school engagement will be coordinated by the department, and the appropriate departmental team will work with you to support this process.

Participation in this project remains at the discretion of the relevant school principal, staff, parents, and individual participants.

Any further changes to your research must be submitted to the department for approval. This confirmation is valid for six months after the report submission date indicated in your research application.

The department is interested in findings from your research and request that all final reports, proposed media releases and/or publications be provided to the department for review 30 days prior to publication.

If you have any questions or require further assistance, please contact the department on (08) 8999 5772 or via email at [researchapps.det@education.nt.gov.au](mailto:researchapps.det@education.nt.gov.au).

Yours sincerely,

**Emily Leung**
